۵. متن زیر را بخوانید و به سوالات زیر پاسخ دهید. (۲ نمره)

Polar bears are one of the world's largest animals. They live in the north, around the area of the Arctic ocean. People cannot hunt them because they are endangered animals. About the age of four or five the polar bears can start having babies. They usually have two babies. They stay at their homes over winter and come out in spring with the babies. The babies are very small when they're born. They are the size of a big mouse. They can become as big as a full man size in a year if they eat lots of food. Their favorite food is seal but they sometimes eat other kinds of animals.

45. Where do polar bears live?

.....

46. How big will the baby bears become after a year?

.....

47. They stay at their homes over winter and come out in spring with the babies.

a. True b. False

48. Polar bears usually have five babies.

a. True b. False

"You are special and unique "
