Bacteria and viruses are two important types of microbes. Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact, you couldn't live without some bacteria!

Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses. They usually attack your body and make you sick!

1. Where can bacteria live?

2. Viruses are bigger than bacteria. a) true b) false

3. Bacteria have one cell. a) true b) false

4. Viruses can live in any place in the world. a) true b) false
